

## DRAINAGE TROLLEYS

Food waste from restaurants/canteens is often quite wet. All material should, if possible, be drained from excess water. For canteens we can offer a trolley to facilitate the drainage and handling of the food waste. The principle is quite simple using one bucket, with holes at the bottom, that holds the food waste and one bucket below this that receives the excess water.

### TROLLEY 2+2 25L

The capacity of this trolley is 50 litres of food waste per day. The buckets each contains 25 litres and are easily lifted from the trolley. They are also easy to clean.

Width: 620 mm.

Depth: 400 mm.

Height: 670 mm

### TROLLEY 2+2 25L

### TROLLEY 4+4 10L

### TROLLEY 4+4 10L

The capacity of this trolley is 40 litres of food waste per day. The buckets each contain 10 litres and are easily lifted from the trolley. They are also easy to clean.

Width: 950 mm.

Depth: 310 mm.

Height: 860 mm including handle.
